PROJECTS

Disney Hotstar Clone | Web Development
Self Learning Project
📅 August 2023

- This website was created with the React Library. Trending and new movies are retrieved via the TMDB API. Firebase serves as an authentication tool. For state management, redux toolkit is employed.

Virtual Quiz System using Python | Artificial Intelligence
Collaborative Project
📅 April 2023

- This system built using Python for attending online examinations through hand gestures rather than using any pointing devices that provides an engaging and interactive platform for the users.

News Reader AI | Web Development
Self learning Project
📅 January 2023

- This app utilizes ALAN AI to enable users interact with the app through their voice and responds by displaying or reading the relevant news using text-to-speech technology.

CRED UI Clone | Web Development
Self learning Project
📅 November 2022

- This project is a clone of the Home page interface of the CRED app, built with the React framework and style sheets produced by the Tailwind framework.

Google Keep Clone | Web Development
Self learning Project
📅 September 2022

- A full-featured note-taking program inspired by Google Keep that uses the well-liked React and Material UI frameworks to produce style sheets.
